VOLUME CONTENTS

Volume 10, Number 1/2

COLUMBUS V SYMPOSIUM ON SPACE STATION UTILIZATION

v Preface

J. B. Mennicken — 1 Introduction

Fredrik Engström — 3 Welcome Address

COLUMBUS STATUS

Flight Segment

John David F. Bartoe — 5 Space Station Freedom: status of the U.S. segment

Fredrik Engström — 9 Columbus in the framework of Space Station Freedom

Technical Supports

R. Bryan Erb — 19 Canada's Mobile Servicing System

A. De Agostini — 27 The European Data Relay System

Decentralized Facilities

Joachim G. Kehr — 35 Columbus decentralized operations: the Manned Space Laboratories Control Center (MSCC)

Hans M. Kappler, H. J. C. Koopmann and H. Michaelis — 49 Columbus Free Flyer Center for support of missions of the Columbus Free Flying Laboratory

COLUMBUS UTILIZATION

National Research Programmes in Support of Columbus

F. Unz — 57 The USO Team at work at DLR

W. U. Klein — 61 Presentation of the USO Planning in the Member States—F.R.G.

L. R. Decramer — 63 Presentation of the USO Planning in the Member States—France

P. de las Morenas — 65 Presentation of the USO Planning in the Member States—Spain

Marie-Claude Limbourg — 69 Presentation of the USO Planning in the Member States—Belgium

F. B. Visser — 73 Presentation of the USO Planning in the Member States—The Netherlands

Thomas A. E. Andersen — 75 Presentation of the USO Planning in the Member States—Denmark

D. E. Hermansen 77 Presentation of the USO Planning in the Member States—Norway

The Scientific Community: Views, Needs, Involvements

H. Olthof 79 Space science with Columbus—4. Small and rapid response payloads (SARRs)

G. Seibert 81 The ESA Microgravity Programme and its use of the Columbus infrastructure

R. Monti 93 Fluid Science Laboratory scientific study for Columbus

Augusto Cogoli 97 Status of Biolab

Flemming Bonde-Petersen 99 The Anthrolab: human physiological research on Columbus Attached Laboratory

Payloads and Payload Operations

George P. Haskell 101 Attached payloads support systems (APLSS) study

Marc Toussaint 105 Automation and Robotics (A&R) on-board

B. Feuerbacher, C. Mirra, L. G. Napolitano and **K. Wittmann** 109 Experience and concepts in microgravity user support

Telescience Activities

G. Naja, C. Ricaud and **J. Tailhades** 117 Telescience: a Test Bed for operations

H. P. Schmidt, E. Bennet, G. Kaul, K. Wittmann and **C. Putz** 121 Telescience concept: from TEXUS to Space Station

R. Monti and **R. Fortezza** 127 Teletexus experiment: preliminary experience for the Columbus programme

I Appendix A—Scientific Programme

V Appendix B—List of Participants and their Organizations

Volume 10, Number 3

Brian S. Spooner, Dale E. Claassen and **James A. Guikema** 135 Performance of a blood chemistry analyzer during parabolic flight

Y. Morishita, N. Saito, M. Saito, Y. Horikawa and **K. Higuchi** 139 Program status and plan of JEM

L. G. Napolitano, R. Fortezza and **F. Mele** 145 Knowledge engineering and expert systems for microgravity

Mark K. Craig 153 Integrated strategies for the exploration of Mars

Louis Friedman 157 The cost of a piloted mission to Mars

E. Bertenyi 161 Space segment configuration of Canada's mobile satellite system

Lars G. Tedeman 167 Safety approach for ESA space programmes

Darren McKnight, Malcolm Wolfe, Vladimir Chobotov, David Cooke, Robert Culp, Michael Michaud, F. Kenneth Schwetje and **L. G. Taff** 175 The orbital debris issue: a status report

H. Hermann Koelle 185 Lunar orbit service station

i New Patents

Volume 10, Number 4

G. Aloisio, N. Veneziani, G. Fox and **G. Milillo** 189 Computational load evaluation for the real-time compression of X-SAR raw data

H. Eschapasse, J. P. Pouliquen and **R. Tribes** 201 Inter Orbit Communication

W. Vernon Jones 207 A small and rapid response research program for Space Station Freedom

William M. Piland and **Theodore A. Talay** 215 Advanced Manned Launch System comparisons

N. Tanatsugu, T. Honda, Y. Sagiya and **K. Higashino** 225 Development study on the Air Turbo-Ramjet for future space planes

G. Berzins, R. Phillips, J. Singh and **P. Wood** 231 INMARSAT: Worldwide mobile satellite services on seas, in air and on land

i New Patents
